SECTION 9 — VALUATION FRAMEWORK

SEED ROUND (FEBRUARY 2026)

METHOD	VALUE
Pre-money valuation	₦562.5M (\$375K)
Raise amount	₦112.5M (\$75K)
Post-money valuation	₦675M (\$450K)
Equity offered	20%
Implied revenue multiple (on Y2 projection)	7.6× ARR

Comparable transactions:

- African consumer tech seed rounds (2023–2025): \$50K–\$200K at \$300K–\$1M post-money
- SaaS marketplace businesses at seed: 8–15× ARR is standard
- At 7.6× projected Year 2 ARR, this is conservative for a marketplace with compounding data moat

SERIES A TARGET (MONTH 18–24)

METRIC	TARGET
MAU	25,000
ARR	₦88.7M (\$59K)
Merchants	300
Series A Raise	₦1.5B–₦2.25B (\$1M–\$1.5M)
Target valuation	15–20× ARR = ₦1.33B–₦1.77B (\$888K–\$1.18M)
Use of A round	City expansion (Abuja, PH, Ibadan), team build-out, Data API productisation

SECTION 10 — KEY PERFORMANCE METRICS

NORTH STAR: WEEKLY ACTIVE SCOUTS

The number of unique users who submit at least 1 rating per week. This drives everything — data quality, score accuracy, product utility, merchant value, and subscription conversion.

Metric	Month 6	Month 12	Month 24
MAU	1,000	5,000	25,000
Weekly Active Scouts	200	1,000	5,000
Ratings/week	600	3,000	15,000
Venues with live data	30	80	200
Average ratings/venue/day	3	5	11

A venue needs ~5 ratings/day to produce reliable, real-time scores. 11 ratings/day is the threshold where time-decay weighting has enough data to produce smooth, accurate curves.

DASHBOARD KPIS

KPI	Target (Month 12)	Target (Month 24)
MAU	5,000	25,000
D7 Retention	25%	35%
D30 Retention	15%	22%
VIIBE+ Subscribers	250	1,250
Active Merchant Venues	50	300
Avg Ratings/Active Venue/Day	5	11
VIIBE Certified Venues	2	15
Monthly Gross Revenue (¥)	693K	7.4M
Platform MRR Growth MoM	20%+	15%+

SECTION 11 — RISK REGISTER

RISK	LIKELIHOOD	IMPACT	MITIGATION
Cold start problem (not enough scouts)	High	High	Scout ambassador program with VIIBE+ incentives from Day 1
FX deterioration (Naira weakening)	Medium	Medium	Revenue is Naira-denominated; cost base is largely local; USD exposure is hosting only
Promoter backlash (venues blocking scouts)	Medium	Medium	Scouts are anonymous. Venue check-in is not required to rate.
Competitor entry (well-funded)	Low	High	Data moat + local trust + Paystack integration = 12-18 month head start minimum
Paystack outage / regulation change	Low	Medium	All payments are single-processor; diversify to Flutterwave as backup in Year 2
Scout gaming / fake ratings	Medium	High	5-layer anti-cheat system (geofence + cooldown + burst detection + accuracy tracking + VIIBE Certified)
Merchant churn before data value clicks	High (early)	Medium	Free 30-day trial removes the initial barrier; weekly performance emails demonstrate value
AI API cost blowout	Low	Low	Claude Haiku is \$0.25/M tokens. Estimated \$2/month Year 1. Even at 100x growth it's negligible.
